BUSINESS OVERVIEW

Founded in Estonia in 1993, Proekspert is a full-service digital transformation partner for international companies.

Proekspert's vision is a world without digital waste — the total elimination of inefficient ways of doing things through the creation of new and better human-centric digital solutions.

With strong competencies in business analytics, data science, service design, and service development, Proekspert helps you boost your company's capability of creating and delivering products that have a clear positive impact.

No matter the stage of your digital transformation, Proekspert can demonstrate more efficient alternatives to building your digital product.

PRODUCTS AND SERVICES

Working with our customers we build smarter services and design a better future.

We provide a full range of services, from business analysis to creating ready-to-market products. We give our customers a competitive edge by testing new business ideas quickly, while managing possible risks, and taking responsibility for the entire product development process.

We are experts in making machines and devices smarter, creating self-service environments, mobile applications, predictive analytics, data analysis, usability and design.

Proekspert stands out for its wealth of experience in software development for industrial automatics.
