

experience the commitment

CGI Estonia helps develop mission-critical e-solutions which are compatible with your legal, organizational, and technical environment.

Benefits of Working with CGI Estonia:

- global experience in finding the most innovative and smart e-solutions to meet your business and IT challenges
- strategic thinking to develop easy-to-use and highly compatible e-solutions
- delivering on time and within budget — our client satisfaction index of 9/10 proves our commitment

References:

- **Estonian Agricultural Registers and Information Board:** now over 70% of subsidy applications are submitted online

We built an integrated information system to speed up EU farming grants processing and get payments to qualified applicants in a fast, efficient, and accurate manner. Now over 70% of subsidy applications are submitted online. This has already saved tens of thousands of work hours, allowing more time to focus on complex measures and eliminating the mistakes associated with manual processing.

- **Estonian Employment Register for Estonian Tax and Customs Board:** € 5.1 million extra tax revenue within 4 months

We delivered and integrated a new unified electronic employment register which reduces the administrative burden and cost for employers and numerous government agencies using employment data. National electronic employment registration has been shown to help reduce illegal employment, improve worker protection, and collect taxes more effectively.

- **Estonian Emergency Response Centre for The Ministry of Interior:** saving lives with faster response times

Our emergency response system helped reduce the response time between answering emergency 112 calls and the arrival of emergency services at the scene. Implementing this e-solution dramatically improved response times and helped save lives. At the heart of the system is a user-friendly digital map displaying the scene of the incident, the fastest dispatch routes, and real-time locations of available resources.

within only
4 months,
9,000 new
taxpayers were
added to the
Estonian
employment
register,
generating
€ 5.1 million
in extra tax
revenue
