

fleet and team management solution

Scania CER sales staff improved efficiency by 15% after using Ecofleet

Our GPS-based fleet and team management solution helps to find the most profitable way to manage your line of vehicles and work processes.

Industries using Ecofleet solutions:

Key benefits:

- all daily routines like route planning and workflows can be automated to save time and money
- saving fuel: optimized routes and analyzed drivers behaviour can give a notable saving in fuel consumption
- easy access to important data from moving vehicles over the web
- smart statistic analysis helps optimize your carpark size and assures equal vehicle usage

Our strengths:

- highly experienced in finding the best solutions: we are one of the leading telematics providers in Scandinavia
- flexible in our offering: both smaller car fleets and large-scale truck companies find remarkable benefits
- fast customer service: 80% requests are solved within 2 hours
- really simple to use on desktops, tablets, and mobiles

Target groups:

- companies with carparks in the range of 10 vehicles to thousands
- companies with trucks
- logistics companies
- security companies
- heavy machinery companies

References:

- international security service provider G4S
- telecom company Telia Company
- escalator and elevator manufacturer and maintenance company Schindler Group
