GoSwift
QUEUE MANAGEMENT SERVICE

just in-time access to transport gateways

GoSwift is providing support for Integrated Border Management designed for law enforcement authorities to help increase security and facilitate the movement of bona fide travellers and cargo.

Benefits with Queue Management Service:

better security

better resource planning

increased efficiency in trade corridors

better planning of driving/resting times

improved risk analysis

All GoSwift services are in line with the four-tier access control model and they include the following modules:
• booking
• queueing
• monitoring
• reporting
• parking area management
• access control
• call centre
• self-service terminals
• payment collection
• data analytics
• data integration
