data is everywhere. we make it meaningful.

In the era of ubiquitous data, it becomes more and more difficult to filter out actionable insights from an abundance of noise.

PROEKSPERT

data science

Our data-driven approach enables better business decisions – we help you avoid critical failures, optimize costs, improve efficiency, and achieve better business understanding.

We offer end-to-end solutions, including data warehousing, data visualization and reporting, AI-enhanced control systems, anomaly and fault detection, diagnostic suggestions, automated equipment configurations, predictive maintenance, marketing automation, recommendation engines, credit scoring, and fraud detection.

How we work:

Technical analysis

Deployment

Pre-analysis

Prototyping

Keywords:
- machine learning
- artificial intelligence
- data mining
- deep learning
- predictive modelling
- data visualization and reporting

Target group:
Manufacturing, logistics, shipping, automotive, telecommunications, fintech

References:
Danfoss Group, Telia Company, Rheinhold & Mahla, Enics, Tallink, Swedbank, Danske Bank, and Enefit.

The trend of adopting data science into business shows no signs of stopping in the coming decades. Let's work together to give your company a head start on this exciting journey.
