BUSINESS OVERVIEW:

Teede Tehnokeskus is the centre of excellence for road construction in Estonia. For more than 55 years, scientists have worked together with the road construction industry, researching materials and testing roads. Scientific research is always motivated by real-life situations and a challenging climate, so, over the years, Teede Tehnokeskus has grown into one of the most advanced road consulting companies in the region.

CORE COMPETENCIES

Teede Tehnokeskus' competencies span the life-cycle of the road:

- Scientific research of materials, durability, building methods etc.
- Road-related measurements and laboratory tests
- Creating IT solutions for intelligent road maintenance and construction
- Developing, operating and maintaining intelligent transport systems
- Technical consultations and supervision
- Expert assessments, training, certification
