BUSINESS OVERVIEW

outl1ne

Outl1ne is a digital product agency located in Tallinn, Estonia. We focus on UI/UX design and software development. The team consists of creative, experienced and tech-savvy people who have a passion for creating high quality products. Our mission is to boost our client's businesses through carefully planned and well built solutions.

SERVICES & PRODUCTS

Start Smart - you have an idea for a product, but are not completely sure how to execute it and if there's a market need. Before going "all-in", we will help you create a minimum viable product (MVP) and validate it.

Software development - using our expertise in technologies like Laravel, React and Node.js, we are able to integrate with your development team or take over an existing project.

Product Design - visually appealing user interfaces and user-centered design is at the core of each one of our projects. We take pride in creating something beautiful and enjoyable to use.

Microservices - We're always ready to build independent pieces of a larger product, for example an API or a web client that works with an existing API.

SUCCESS STORIES

High Mobility car emulator and developer center HIGH MOBILITY is an award-winning API platform for creating easy-to-use digital developer tools and a thriving community around connected cars.

Postimees - Postimees is the largest media corporation in the Baltics, as well as the only one to combine both printed and electronic media in Estonia.

Turnit Ride web and mobile sales - Turnit Ride is a universal digital ticketing solution for the passenger transport industry.

University of Tartu Institute of Genomics - Solution for the population of Estonia to collect and analyse their genes. Platform has been used to collect more than 200 000 digitally signed consent applications.
