Tietoevry creates purposeful technology that reinvents the world for good. We are a leading technology company with a strong Nordic heritage and global capabilities. Based on our core values of openness, trust and diversity, we work with our customers to develop digital futures where businesses, societies and humanity thrive.

Our 24 000 experts globally specialize in cloud, data and software, serving thousands of enterprise and public-sector customers in more than 90 countries. Tietoevry's annual turnover is approximately EUR 3 billion and the company's shares are listed on the NASDAQ exchange in Helsinki and Stockholm, as well as on Oslo Børs.

Tietoevry's focus industries are: the public sector, financial services, healthcare & welfare, logistics, manufacturing and retail, energy utilities and telecommunications.

SOFTWARE SERVICES

We support our customers through their digital transformation journey, helping them to drive efficiencies, design innovative services and invent new business models. In order to achieve our business goals, we are ready to put all our resources — professional and responsible team, in-depth knowledge of business processes and Tietoevry's international competencies into work. We have been implementing information systems for streamlining and optimizing business processes in Estonia for more than 25 years. Based on our customer experience, we focus on a service-based approach, creating innovation and value for our customers through digitalization, change management and data-driven technology; service and experience design, business and data analysis, customized software development, implementation and integration with third-party software.

INDUSTRY SERVICES

Tietoevry boosts customers' success with an extensive portfolio of segment-specific software, data and integration services digitalizing a variety of industry processes and value chains. Our Data platform services help organizations within both private and public sector, utilizing data in the manner you prefer and creating insights and value-added services for you to better succeed. We continuously develop production management solutions and provide to our customers the best management system based on modern technology.

E-INVOICING AND E-TRADE SERVICES

Tietoevry e-invoicing high-capacity service ensures wide and global coverage for sending and receiving e-invoices. You will receive a secure cloud service that removes the need for licences or on-site hardware.

E-trade services help to digitalize your orders, delivery information, warehouse management as well as consumption and delivery forecasts to make business interactions seamless.

IT MANAGEMENT SERVICES

Our Managed Services offer a digital foundation to integrate the private and public cloud with legacy systems, complementing, optimizing and modernizing the infrastructure for better productivity and cost efficiency. Services include system integration, cloud solutions, hosting and application management with predictive analytics and maintenance. Our specialists have deep X-Road and national Digi-ID competences. Our services allow customers to concentrate on their main business. We are able to serve customers end-to-end at any point in Estonia.

FINANCIAL SERVICES

The financial sector and banking are undergoing fundamental changes and business agility is becoming a core capability to stay ahead. With exponential growth, banks may struggle to operate and compete while using old mainframe solutions. Easy Financial Services - EasyFS® core banking software enables open, modular and scalable banking services to stay ahead of the competition. It is designed as a "plug and play" banking solution, with API-first architecture and local integrations in place. It is easy to add for example NetBank, leasing, factoring, accounting and trade finance modules on a per need-basis. Our financial services and the modular, integrated, cloud-agnostic core banking software for the Baltic region empowers you with end-to-end tools to deliver products and services quickly, all while reducing development and deployment costs.
