

business-to-business (B2B) integration running like a clockwork

e-invoicing and e-trade services

TietoEVRY BIX services: E-Invoicing, E-Trade and Bank Connectivity

TietoEVRY's Business Information Exchange (BIX) services help you harmonize, standardize and simplify digital connections with your domestic and cross-border customers, suppliers, banks, authorities and other stakeholders.

- Save money and CO2
- Optimize delivery accuracy
- Improve business continuity assurance

E-invoicing

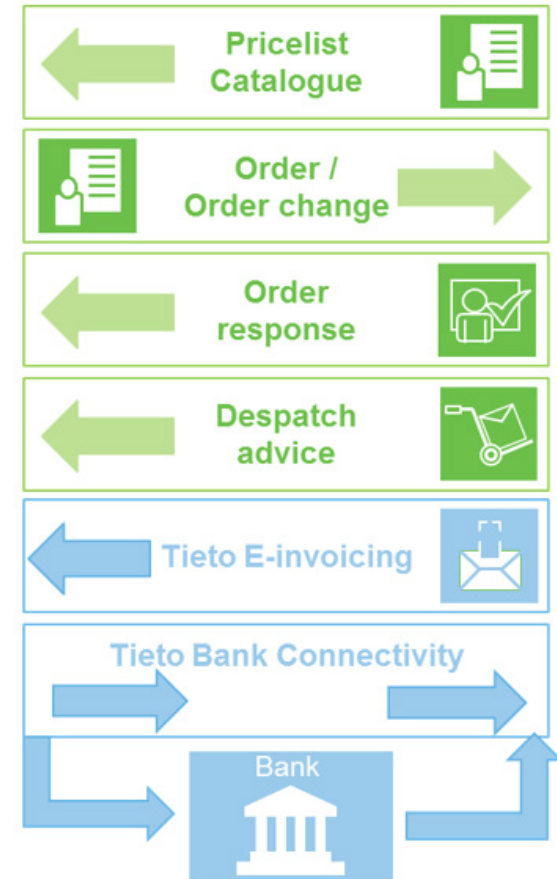

Get digital with BIX E-invoicing services, which cover both sales invoice distribution and purchase invoice collection. Both are EU Norm compliant and supporting variety of different e-invoicing formats. Service can be extended through additional services like a web application, format conversions, validation, attachment handling, digital signing, archiving, printing, mailing, and scanning.

E-trade

Automate your order fulfillment and supply chain processes both for sell and buy sides. BIX E-trade services lets you, your customers and your suppliers take advantage of standardized digital exchange from product and price catalogs to orders, warehouse inventories, demand forecasts and deliveries. Message content validation and an automatic streamlined conversion service between different formats simplify your business transaction handling.

Corporate-to-Bank Connectivity including SWIFT certified Service Bureau

BIX Corporate-to-Bank (C2B) Connectivity offers a single channel that can securely and directly exchange data with multiple banks using the BIX cloud service. We take care of the connection and any necessary security operations so that messages can be exchanged over the different technical channels used by banks.
