

the complete
digital
permitting
system

oversized and/or overweight vehicle permit system

Datel has developed a variety of permit systems over the years including transport sector permit systems. The Oversized and/or Overweight Vehicle Permit System simplifies procedures for issuing transport permits for driving large and/or heavy vehicles on public roads.

Main functionalities:

- Applying for special permits for large and/or heavy vehicles
- Automatic issuing of a permit under standard conditions
- Semi-automatic issuing of a permit under special conditions
- Within the application, you can see the permits issued
- Applicants are kept informed of their application status
- Monitoring system to ensure road safety and mass compliance with public roads

Key benefits:

- Convenient to use. The complete digital permitting system;
- Helps to be better equipped to plan for the future and understand challenges related to roads;
- Helps to prevent the deterioration of small public roads.

Target groups:

- Permitting authorities
- Regional, local officials responsible for permits
- Public sector — municipal governments
