

the go-to choice for successful eEducation journey

According to the 2018 PISA tests results, Estonia is among the TOP countries globally and the absolute best in Europe – also ranked #1 by all of the OECD countries. Estonia is number one in EU in all three domains of assessment: in reading, mathematics and science.

schoolaby

Schoolaby is a revolutionary learning management platform that enables remote or hybrid learning. Either in the classroom or at home, Schoolaby keeps students, teachers and parents always on the right track.

Schoolaby provides an easy-to-use light-weight learning management system that connects countless external sources and gives teachers more freedom in compiling the courses with the most interesting and up-to-date external study materials/apps. By using LTI standard and xAPI the students' results will be gathered automatically from these external platforms facilitating the assessment process for teachers regardless of the different sources of the resource. Personal or segmented learning paths can be composed for more impactful learning experiences.

Everything a learning management system should have (and more):

Value for:

- Teacher - a single gateway for distance or hybrid learning with templates for designing courses and easy management of assignments, tests, grading and feedback
- Student - engaging study content with 24/7 access over PC and mobile
- Parent - ease of access to see the child's study progress and results
- School - efficient management of distance learning and gateway for assignments and grading

Reference:

Schoolaby is developed in co-operation with the education scientists of the University of Tallinn.

"Schoolaby is a light-weight COVID breaker for arranging distance and hybrid teaching in a most efficient way."

- Senior Researcher Mart Laanpere, Tallinn University.
