# we help companies choose the best solutions from Microsoft's cloud ecosystem and keep development and change initiatives under control

# industry solutions from Tietoevry

Our industry and business application solutions grow the production volume and efficiency through integrated systems and reduce waste and time losses.

Your business vision and strategy place a great deal of expectation on application landscapes. Operational efficiency is a must, both in ICT operations and business processes, as business growth and innovations require agile development and new digital services.

We understand that the successful implementation of business applications requires both a good understanding of the customer's business and in-depth knowledge of the solutions. Some of our focus areas include the financial, manufacturing, healthcare, welfare, retail, wholesale and forestry sectors. Our local presence and industry-focused consultants, zero-touch automation approach, agile and DevOps ways of working and global delivery excellence offer you and your business optimal execution.

We help companies choose the best solutions from Microsoft's cloud ecosystem and keep development and change initiatives under control. In the cloud, the newest CRM and ERP features are always available as development cycles accelerate. Standard Dynamics 365 processes also enable quick time-to-market benefits.

We are a Microsoft Gold Partner in multiple different competence areas and offer full support across the Microsoft product portfolio. We have the expertise to support applications throughout their life-cycle. Our 3,500 Microsoft experts offer business-oriented, large-scale support for companies and organizations across the Nordics and the Baltic Sea region.
