BUSINESS OVERVIEW

Proud Engineers drives global digital transformation by offering strategic innovation and governance solutions. We specialize in launching and enhancing digital systems with services including digital readiness assessments and continuous consultancy support. Building a digital society involves starting from scratch or optimizing legacy systems. We provide digital maturity assessments and long-term consultancy to guide these transformations.

We don't just advise on digital transformation; we architect it.

Our team includes esteemed experts such as the first CIO of the Republic of Estonia, the creator of the world's first Data Embassy, the CTO who advanced Skype, and a TedX speaker skilled in team empowerment. We have completed projects in over 60 countries, working with large corporations, governments, and international organizations. Our team, with an average of 15 years of IT experience, has built the digital infrastructure that made Estonia a model of digital innovation.

Services highlights

- Digital Health Consultancy — Designing and implementing innovative eHealth solutions.
- Data Architecture & Governance Reviews — Enhancing data systems for efficiency and compliance.
- Project Oversight — Ensuring projects align with strategic goals and deliver on time and budget.
- Architecture of Enterprise Consultancy — Optimizing enterprise structures for digital growth.
- Shadow Advisory — Providing discreet, strategic advice on digital policies and architectures.
- Trainings & Keynotes — Offering expert-led training and motivational keynotes.
- Strategy and Roadmap Co-Creation — Developing and implementing customized digital strategies.
- Service Design & Prototyping — Creating user-centric services and prototypes.
- Business Analysis — Streamlining service delivery for key life events.
- Legal Analysis — Ensuring digital initiatives comply with legal standards.
