## BUSINESS OVERVIEW

Introduct Group is an international technology partner delivering software solutions for startups, enterprises, and global brands. We specialize in fintech, insurance, logistics, gaming, sports, and data platforms. Our teams transform complex ideas into scalable digital products, combining engineering, automation, and UX design. With offices across Europe, we create measurable impact for clients by improving efficiency, decision-making, and customer experience.

### Products/services overview

- **Software development & digital product engineering**  
Web, mobile, and enterprise solutions tailored to specific business needs, including high-load platforms, integrations, and automation.
- **Dedicated development teams & managed delivery**  
Scalable engineering teams supporting long-term projects, rapid product growth, or extension of internal capabilities.
- **Global support & operations**  
24/7 customer support, SLA-based technical assistance, and continuous product maintenance.
- **Training & talent development**  
[Introduct Academy](#) prepares specialists trained directly on client codebases to ensure a fast and smooth onboarding into real projects.
- **Investment & venture support**  
We help investors participate in Introduct-led technology initiatives and support early-stage product development.

### Core Competencies

- Full-cycle product development, from idea to launch
- Sector expertise in fintech, insurance, logistics, gaming, and sports tech
- Scalable system architecture and automation solutions
- Data-driven platforms and workflow optimization
- Global support operations with multi-country delivery teams

### Customer portfolio/case studies

- **Fundvest** — Mobile investment platform enabling trading and auto-investing for retail clients.
- **SALVA** — Customer-facing insurance services with real-time policy management and rewards.
- **SelectZero** — Data observation platform for automated monitoring and reporting.
- **Golf Pro Stats** — Mobile app consolidating professional golf data for fans worldwide.
