# Security Operations Center as a Service

Telia SOCaaS offers a centralised cybersecurity operations centre, enabling organisations to prevent, detect, and respond to cyber threats 24/7. The service removes the need for in-house infrastructure and specialist staff, providing robust protection for critical systems.

## Key benefits

- Predictable Costs: Fixed monthly fee, eliminating major capital expenditure
- 24/7 Monitoring & Rapid Incident Response: Guaranteed response to high-priority incidents within one hour; initial containment within four hours (SLA).
- Expertise & Technology: Access to certified professionals and leading platforms, including Microsoft Defender XDR, Sentinel, and Trend Micro Vision One XDR.
- Business Focus: Allows organisations to concentrate on core activities while Telia manages cybersecurity.
- Brand Protection: Demonstrates a strong commitment to security for customers and partners.

## Service Deliverables

- Continuous monitoring of digital assets
- Threat detection, analysis, and incident management
- Guidance on security best practices and risk mitigation
- Regular security reports and actionable recommendations
- Support for tailored security solutions.

## Target Audience

- Organizations prioritising business continuity and growth
- Companies seeking cost-effective, enterprise-grade security
- Businesses requiring advanced cybersecurity without major investments.

## Technology & Operations

- Cloud-first solutions leveraging Microsoft Security, Trend Micro, XDR, NDR, and advanced log analytics
- Automation and system hardening for efficient incident resolution
- Transparent governance with monthly reporting and full incident lifecycle visibility
- Support in Estonian and English, ensuring direct access to expertise.

## Certified Expertise

The team holds globally recognised certifications, including ISC2 CISSP, CCSP, SSCP, Trend Micro Vision One XDR, CompTIA CySA+, GIAC Security Operations Certified, and Microsoft SC-200.

## Proven Impact

Telia SOCaaS has helped clients address risks such as exposed SaaS platforms, legacy authentication vulnerabilities, weak password policies, malicious CAPTCHA attacks, and perimeter security gaps.

## Getting Started

- Asset and technology mapping with Telia
- Fast onboarding or tailored integration with existing solutions
- Contact Telia and request a proposal.
